Merit Tool Company Obtains ISO 9001:2008 Certification

Forty Three Year Old Precision Machining and Tool Shop Demonstrates Commitment to Quality

ERIE, Pa. – Merit Tool Company, Inc., announced today it has received international recognition of quality excellence in its process management system for the production of precision machined components. Merit Tool Company Obtained its ISO 9001:2008 Registration from NSF International Strategic Registrations, Ltd. (NSF-ISR).

Used by leading companies around the world, the ISO 9001:2008 standard was revised and released at the end of 2008 and provides a universal baseline for quality management. Certification to the standard is awarded after an in-depth audit of business methodology, products and processes has been performed. NSF-ISR, a world leader in management systems registrations, conducted the third-party certification audit for Merit Tool Company.

Merit Tool Company, which focuses on precision machining and quick turnaround machined parts, now joins a select group of ISO 9001:2008 certified businesses that are service-oriented. Achieving this leadership position in the Precision Machining Industry reinforces Merit Tool Company's commitment to meeting or exceeding client expectations by establishing an intentional, consistent and proven quality management system
